**COURSE LEARNING OUTCOME**

CLO1: To synthesise research articles based on the objective of a project-based proposal (A4, PLO5)

**INSTRUCTIONS**

1. Attempt the two (2) tasks set for this assessment.
2. Submit ALL (both tasks, the selected articles, and the Turnitin similarity report) by **November 18, 2022**.

**VERIFIED BY:**

**DR. RUHIL AMAL BINTI AZMUDDIN**

**HEAD OF PROGRAMME (ENGLISH LANGUAGE)**

**CENTRE FOR MODERN LANGUAGES**

## Task 1 Identifying Main Points of Articles

### The objective of the Synthesis:

The research hoped will help students who are having trouble acquiring meals at the right time with a fair price dan information about the food menu in the campus cafeterias.

| No. | Article Referencing Information   | Main Points  |
|-----|---|--|
| 1   | <b>AMALAN PEMAKANAN DALAM KALANGAN PELAJAR UNIVERSITI DAN IMPLIKASINYA</b> by <i>MOHD AZLAN ABDULLAH &amp; NORAZIAH ALI</i> | <p>For every student, the cafeteria's location on campus is crucial because it allows them to get food at specific times, including before class, after class, and at night.</p> <p>A campus cafeteria must operate at hours that accommodate students' demands so that they may conveniently acquire meals whenever they desire.</p> <p>To prevent students from getting bored with the same cuisine every day, the selection of food should be changed every day at a reasonable price</p>   |

Student satisfaction that there is a cafeteria that offers food services is important because the cafeteria on campus is the main source for students to get food and necessities.</p> <p>Food sources on campus affect the learning process because the nutrients, quantity, and price of food play an important role</p>                |
| 3   | <b>SUATU KAJIAN TERHADAP 'FOOD COURT INDERA SAKTI' UITM PERAK</b> by <i>MOHD FADZIL ABDUL RASHID</i>                        | <p>The research intends to analyse the dietary habits of university students and their understanding of healthy dietary habits, and the findings show that students have a solid understanding of features of excellent nutrition and healthier eating.</p> <p>According to the survey table from this study, many students choose bread for breakfast, followed by heavy meals like a mix for lunch and fried food and other options than rice for dinner.</p> <p>According to the study used for this research, most students eat between 8 am -10 am as opposed to skipping breakfast, while most students usually eat lunch between 12 noon - 2 pm and most students eat between 8 pm -10 pm during the evening.</p> |

## **Task 2 Synthesising the Main Points**

As we know, students cannot be separated from the food that is connected through the cafeteria around the campus to continue survival in the university, but some problems arise from this cycle. studies show that for every student, the cafeteria's location on campus is crucial because it allows them to get food at specific times, including before class, after class, and at night. Second, a campus cafeteria must operate at hours that accommodate students' demands so that they may conveniently acquire meals whenever they desire and to prevent students from getting bored with the same cuisine every day, the selection of food should be changed every day at a reasonable price (M. A. Abdullah, 2011). Thirdly, the research intends to analyse the dietary habits of university students and their understanding of healthy dietary habits, and the findings show that students have a solid understanding of features of excellent nutrition and healthier eating. Next, according to the survey table from this study, many students choose bread for breakfast, followed by heavy meals like a mix for lunch and fried food and other options than rice for dinner. Besides that, according to the study used for this research, most students eat between 8 am - 10 am as opposed to skipping breakfast, while most students usually eat lunch between 12 noon - 2 pm and most students have dinner between 8 pm - 10 pm (M. A. Abdul Rashid, 2010). Furthermore, this study aims to find out how happy students are with the services offered by the cafeteria on the UMS campus in terms of cleanliness, types of food menu, prices, and operating hours(3a). Meanwhile, according to the survey's findings, respondents are least satisfied with the cafeteria's lack of facilities, cleanliness, pricing for food and beverages, and food quality and student satisfaction that there is a cafeteria that offers food services is important because the cafeteria on campus is the main source for students to get food and necessities(3b). In addition, food sources on campus affect the learning process because food's nutrients, quantity, and price play an important role (Ting Ang King, 2012). In conclusion, at the end that the results of the research hoped will help students r who are having trouble acquiring meals at the right time with a fair price dan information about the food menu which is in the campus cafeterias.
